1. Executive Summary

Trivarta Tech Private Limited is pleased to present this comprehensive proposal for the implementation of our School ERP (Enterprise Resource Planning) system. Our platform is designed to completely digitize and streamline all school operations, from academic management and student enrollment to financial accounting and parent engagement.

Our School ERP is a modern, cloud-ready, multi-tenant SaaS platform that supports multiple schools under a single organization. Built with cutting-edge technologies, it provides a unified solution that eliminates the inefficiencies of fragmented systems and manual processes.

What truly sets our ERP apart is the deep integration of Artificial Intelligence and Real-Time GPS Tracking. AI powers intelligent chatbots, automated report card generation, predictive analytics, and data-driven insights that transform how schools make decisions. Meanwhile, our advanced GPS tracking system provides real-time vehicle location monitoring, route optimization, and live tracking for parents, ensuring complete safety and transparency in student transportation.

The platform is delivered as a complete package comprising a feature-rich web application and native mobile applications for Android and iOS. With 22+ integrated modules, role-based access for 9+ user types, real-time dashboards, multi-channel communication, and a powerful mobile app, our ERP is the definitive solution for schools seeking a complete digital transformation.

2. AI-Powered Intelligence (Key Differentiator)

ARTIFICIAL INTELLIGENCE AT THE CORE

Our ERP leverages cutting-edge AI to automate repetitive tasks, generate intelligent insights, and empower smarter decision-making across every level of school management.

2.1 AI Chatbot & Virtual Assistant

Our intelligent AI chatbot serves as a 24/7 virtual assistant for students, parents, teachers, and administrators. It instantly answers queries about fees, attendance, exam schedules, school policies, and more, significantly reducing the burden on administrative staff and providing immediate support.

- **Instant Query Resolution:** Students and parents can ask questions about fees, grades, attendance, timetables, and school events and receive immediate, accurate responses.
- **Natural Language Understanding:** The chatbot understands questions in natural conversational language, making it accessible to users of all technical abilities.
- **Multi-Context Awareness:** The AI is aware of the user's role, class, section, and school context, providing personalized and relevant responses.
- **24/7 Availability:** Unlike human staff, the AI chatbot is available round the clock, ensuring support is never unavailable.
- **Escalation to Humans:** Complex queries that the AI cannot resolve are automatically escalated to the appropriate staff member.
- **Mobile & Web Access:** The AI chatbot is available on both the web platform and native mobile applications for seamless access anywhere.

TRIVARTA TECH PVT LTD

2.2 AI-Generated Report Card Comments

Writing individualized comments for hundreds of students is one of the most time-consuming tasks for teachers. Our AI analyzes each student's academic performance, attendance patterns, and behavioral data to automatically generate personalized, meaningful report card comments.

- **Performance-Based Generation:** Comments are tailored based on the student's marks, grade trends, strengths, and areas for improvement across all subjects.
- **Attendance Pattern Analysis:** The AI factors in attendance data to provide holistic feedback, noting students with excellent attendance or those who may need support.

- **Customizable Tone:** Teachers can choose the tone (encouraging, constructive, formal) and the AI adapts accordingly.
- **Teacher Override:** AI-generated comments serve as intelligent drafts that teachers can review, edit, and approve before finalization.
- **Time Savings:** Reduces report card preparation time by up to 80%, freeing teachers to focus on teaching and mentoring.

2.3 AI Analytics & Data-Driven Insights

Our AI engine continuously analyzes school data to surface actionable insights and trends that would be impossible to detect manually. These insights empower administrators and teachers to make proactive, evidence-based decisions.

- **Academic Performance Trends:** AI identifies students who are improving, declining, or at risk, enabling early intervention before problems escalate.
- **Attendance Pattern Detection:** Automatically flags unusual absence patterns, chronic absenteeism, and correlations between attendance and academic performance.
- **Fee Collection Analytics:** Predicts fee collection trends, identifies defaulter patterns, and recommends optimal follow-up strategies.
- **Resource Utilization Insights:** Analyzes classroom, hostel, and transport utilization to optimize resource allocation and reduce waste.
- **Comparative Benchmarking:** For multi-school organizations, AI provides cross-school performance comparisons and best-practice recommendations.

TRIVARTA TECH PVT LTD

2.4 AI-Powered Smart Recommendations

Beyond analytics, our AI proactively recommends actions to improve outcomes:

- **Student Support Recommendations:** Suggests targeted interventions for underperforming students based on historical data patterns.
- **Timetable Optimization:** Analyzes teacher workloads and student attention patterns to suggest optimal scheduling.
- **Communication Timing:** Recommends the best times and channels for parent communications to maximize engagement.
- **Budget Forecasting:** AI-assisted financial projections help schools plan budgets more accurately based on historical trends.

3. Real-Time GPS Tracking & Transport Intelligence (Key Differentiator)

REAL-TIME GPS TRACKING & SMART TRANSPORT

Student safety is our top priority. Our advanced GPS tracking system provides complete visibility into school transport operations with live vehicle monitoring, smart alerts, and comprehensive route management - accessible on both web and mobile.

3.1 Live Vehicle Tracking

Our GPS tracking system provides real-time location monitoring for every school vehicle. Administrators, transport managers, and parents can view the exact position of any bus or vehicle on an interactive live map at any time, from any device.

- **Real-Time Location Display:** Every vehicle's position is updated continuously on an interactive map, showing current location, speed, and direction of travel.
- **Multi-Vehicle Dashboard:** Transport administrators can monitor the entire fleet simultaneously with a comprehensive dashboard showing all active vehicles.
- **Route Visualization:** The actual path taken by each vehicle is displayed against the planned route, making deviations immediately visible.
- **Historical Route Playback:** Review past journeys with complete route history, stop durations, and timeline for audit and investigation purposes.

TRIVARTA TECH PVT LTD

3.2 Parent Live Tracking & Safety

Parents can track their child's school bus in real time from both the web portal and the mobile app, giving them peace of mind and eliminating the uncertainty of waiting.

- **Live Bus Location for Parents:** Parents see exactly where the school bus is on a map, with estimated arrival time at their child's stop.
- **Pickup & Drop Notifications:** Automatic notifications sent to parents when the bus is approaching the stop, when the child boards, and when the child is dropped off.
- **Delay Alerts:** Instant notifications if the bus is running late due to traffic, route changes, or any other reason.
- **Emergency Alerts:** Immediate notification to parents and administrators in case of any vehicle incident or emergency.

- **Stop-Level ETA:** Accurate estimated time of arrival calculated for each stop based on real-time traffic and current vehicle position.
- **Mobile Push Notifications:** All transport alerts are delivered as real-time push notifications on the mobile app for instant awareness.

3.3 Route Management & Optimization

Comprehensive route management tools allow schools to efficiently plan, manage, and optimize their transport network for maximum coverage and minimum cost.

- **Multi-Stop Route Planning:** Create and manage routes with multiple stops, each with designated pickup and drop-off points.
- **Student-Route Allocation:** Assign students to specific routes and stops, with automated tracking of which students should be on which vehicle.
- **Vehicle Fleet Management:** Track vehicle details, maintenance schedules, capacity, driver assignments, and insurance information.
- **Transport Fee Integration:** Route-based fee calculation automatically integrated with the fee management module.

TRIVARTA TECH PVT LTD

3.4 GPS Data Logging & Analytics

Every GPS data point is logged and analyzed to provide actionable transport intelligence:

- **Complete GPS Log History:** Every vehicle position is recorded with timestamp, speed, and coordinates for complete audit trails.
- **Speed Monitoring:** Automatic detection and alerting when vehicles exceed designated speed limits in school zones or general roads.
- **Stop Duration Analysis:** Track how long vehicles spend at each stop to identify inefficiencies and optimize routes.
- **Fuel & Distance Reports:** Calculate total distance covered per route for accurate fuel consumption tracking and cost management.
- **Driver Performance:** Monitor driving patterns including speed compliance, route adherence, and punctuality for driver accountability.

3.5 Mobile GPS Integration

GPS tracking is a core feature of the mobile application, providing a seamless and powerful experience on smartphones:

D.R.M. Hospital Building

9743136128,8660234312
contactus@trivarta.in
trivarta.in

- **Driver Mobile App:** Drivers share their GPS location via the mobile app, requiring no additional hardware installation in vehicles.
- **Parent Mobile Tracking:** Parents track their child's bus directly from the native mobile app with an interactive live map and arrival countdown.
- **Offline GPS Buffering:** GPS data is buffered when connectivity is poor and automatically synced when the connection is restored.
- **Geofence Alerts:** Automatic notifications when the bus enters or exits designated school zones.

4. Native Mobile Application (Android & iOS)

FULL-FEATURED NATIVE MOBILE APPLICATION

AI Chatbot + Live GPS Tracking + Full ERP Access - Available on Android & iOS

Our School ERP comes with a powerful native mobile application for both Android and iOS platforms. The mobile app brings the full power of the ERP to every stakeholder's smartphone, ensuring anytime, anywhere access to all critical school information, AI features, and real-time GPS tracking.

AI Features on Mobile

- **Mobile AI Chatbot:** Full AI chatbot access from any mobile device for instant query resolution on the go.
- **Smart Push Notifications:** AI-prioritized notifications that surface the most important updates first based on user behavior and preferences.
- **Voice-Enabled Queries:** Parents and students can ask questions by voice, with AI providing spoken responses.
- **AI Performance Summaries:** Weekly AI-generated summaries of student performance delivered as push notifications to parents.

TRIVARTA
TECH PVT LTD

GPS Tracking on Mobile

- **Live Bus Map:** Parents open the app and instantly see their child's bus location on a live, interactive map.
- **Arrival Countdown:** Real-time countdown timer showing exactly when the bus will arrive at the designated stop.
- **Route Alerts:** Instant push notifications for bus arrival, delay, route deviation, or any emergency.
- **Driver GPS App:** Dedicated driver interface that automatically shares GPS location without requiring any manual input.
- **Geofence Alerts:** Automatic notifications when the bus enters or exits designated school zones.

Core Mobile Features

- **Student & Parent Portal:** Complete access to grades, attendance, fee status, timetable, announcements, and school events.
- **QR-Based Attendance:** Teachers can scan student QR codes for attendance marking directly from their smartphones.
- **Real-Time Push Notifications:** Instant notifications for announcements, fee reminders, exam schedules, and important updates.
- **Assignment Submission:** Students can view and submit assignments with file attachments from their mobile devices.
- **Digital Diary Access:** Parents can view and acknowledge daily homework entries from the mobile app.
- **Chat & Messaging:** Instant communication between teachers, parents, and administrators on the go.
- **Mobile Fee Payments:** Secure fee payments directly from the mobile app with payment gateway integration.
- **Offline Mode:** Essential features remain accessible even in areas with limited internet connectivity.
- **Biometric Authentication:** Secure login with fingerprint and face recognition for enhanced security.

5. Complete Module Suite

In addition to our flagship AI, GPS Tracking, and Mobile Application capabilities, the ERP includes 20 more fully integrated modules covering every aspect of school operations:

A. Academic Management

Comprehensive management of all academic operations including student admission and enrollment, staff management, academic year setup, class and section configuration, subject assignment, timetable generation, period and holiday management, roll number assignment, and seamless academic rollover between years.

B. Attendance Management

Modern QR code-based attendance marking with rapid scanning capabilities. Supports manual attendance entry, generates detailed attendance reports and analytics, and provides class-wise and student-wise attendance summaries for comprehensive monitoring.

C. Examination & Grading System

Flexible examination system supporting multiple exam terms, configurable exam types, assessment-based grading, dynamic assessments (midterm, final), teacher-based mark entry, configurable grade calculations, exam scheduling, admit card generation, and custom grading systems with grade ranges and color coding.

TRIVARTA TECH PVT LTD

D. Report Cards

Online report card generation with grade display by subject and term. Includes AI-assisted teacher comment generation, performance analytics, print and PDF export capabilities, and full parent accessibility through the parent portal.

E. Assignments & Learning Materials

Teachers can create and distribute assignments digitally, track student submissions, and provide grades. Supports online learning resources, document and PDF uploads, and download tracking.

F. Student Diary

Digital daily homework and task diary that enables teacher-to-parent communication. Features parent read receipts, completion tracking, and export capabilities.

G. Syllabus Management

D.R.M. Hospital Building
K.S.R.T.C. Depot Road Chitradurga-577501
9743136128,8660234312
contactus@trivarta.in
trivarta.in

Topic-based curriculum tracking that allows teachers to
mark syllabus progress as completed or ongoing. Provides subject-wise syllabus management with export functionality.

H. Fee Management

Advanced fee management with multi-tier fee structures, fee groups and heads, sophisticated fee rules including discounts and surcharges, concessions, payment tracking with receipts, tax calculations, and online payment gateway integration.

I. Finance & Accounting

Complete financial accounting featuring general ledger, double-entry transactions, expense tracking, budget planning, financial statements (Balance Sheet, P&L, Trial Balance, Day Book), and automated GL posting for fees, expenses, and payroll.

J. Payroll & Leave Management

Streamlined employee salary management with leave tracking, configurable leave types, salary processing, leave request workflows, and automated GL posting for salary transactions.

TRIVARTA
TECH PVT LTD

K. Hostel Management

Complete hostel operations including room and bed setup, student allocation with vacancy tracking, mess menu management, QR-verified gate pass system, visitor management, hostel leave requests, and integrated hostel fee management.

L. Front Office Management

Digitized front office operations including visitor log management, QR-verified gate pass issuance, student complaints handling, incoming and outgoing call logs, and official correspondence tracking.

M. Communication System

Multi-channel communication supporting SMS broadcasting, voice announcements, email notifications, WhatsApp integration, in-app notifications, customizable templates, scheduled announcements, and targeted broadcasting.

N. Chat & Messaging

Built-in messaging system enabling direct communication between users, group conversations synced by section, message read receipts, real-time messaging, and participant management.

O. Social Feed

School community social feed allowing post creation with media attachments, comments, likes, and

D.R.M. Hospital Building

9743136128,8660234312
contactus@trivarta.in
trivarta.in

interactive engagement for school-wide connectivity.

P. Parent Portal

Dedicated parent portal providing access to student profiles, academic performance, fee status, attendance, hostel and transport allocation details, document uploads, and profile edit requests.

Q. Student Health & Wellness

Comprehensive health records tracking including medical history, health score calculation, and wellness monitoring. Fully accessible to parents through the parent portal.

R. Transfer Certificates

Digital transfer certificate issuance with approval workflows, automated document generation and printing, and support for official stamps and signatures.

S. Configuration & Settings

Fully customizable system settings including school profile and branding, academic year configuration, format settings, module-level access control, custom fields per entity, and custom roles with permission matrix.

T. Activity & Audit Logging

Complete audit trail with user action tracking, comprehensive change history, and batch transaction tracking for full transparency and accountability.

6. User Roles & Access Control

The ERP implements a robust, multi-level role-based access control system. Each role is configured with specific permissions across both web and mobile platforms, ensuring data security and operational efficiency.

Role	Description & Access Level
Super Admin	Platform-level administration with full access to all organizations and schools. Manages system-wide settings and platform analytics.
School Admin	School-level management with complete control over school operations, settings, staff, and all academic and administrative modules.
Accountant	Specialized access to finance including fee management, expense tracking, payroll processing, ledger management, and financial reporting.
Teacher	Academic and classroom management including attendance, assignments, mark entry, report card comments, diary updates, and syllabus tracking.
Driver	Transport operations access for route information, GPS location updates, and student transport allocation details.
Student	Student portal for viewing grades, attendance, assignments, timetable, fee status, and submitting assignments.
Parent	Parent portal for monitoring child's performance, attendance, fee payments, diary entries, health records, and communications.
Hostel Staff	Hostel operations including room allocation, gate pass verification, visitor management, mess menu updates, and leave approvals.
Front Office	Reception tasks including visitor logging, gate pass issuance, complaint handling, call logging, and correspondence management.
Custom Roles	Schools can create unlimited custom roles with granular, module-level permissions tailored to specific organizational needs.

7. Technology Stack

Our ERP is built on enterprise-grade, modern technologies ensuring performance, security, scalability, and maintainability. AI, GPS, and mobile capabilities are deeply integrated into the technology foundation.

Component	Technology
Backend Framework	Laravel 12 (PHP 8.2+)
Frontend Framework	Vue 3 with Inertia.js
UI Styling	Tailwind CSS 4.2
Database	MySQL
Mobile Application	Native Android & iOS
Authentication	Laravel Sanctum (Token + Session)
Authorization	Spatie Laravel Permission (Role-Based)
AI Engine	Integrated AI Services (Chatbot, Analytics, NLP)
GPS & Location	Real-Time GPS Tracking with Live Map
PDF Generation	Laravel DomPDF
Excel Export	Maatwebsite Excel
QR Code Engine	Endroid QR Code
Real-Time Features	Laravel Broadcasting with Queue
Charts & Analytics	Chart.js with Vue Chart.js
File Storage	Local / AWS S3 Compatible
Build Tool	Vite

TRIVARTA TECH PVT LTD

8. Advantages of Using This ERP

Implementing our School ERP delivers transformative benefits across every department:

1. AI-Powered Intelligence (Game Changer)

Smart AI chatbot for instant 24/7 support, automated report card comment generation that saves teachers 80% of preparation time, predictive analytics for student performance, attendance pattern detection, fee collection forecasting, and proactive smart recommendations. AI transforms your school from reactive to proactive management.

2. Real-Time GPS Tracking (Safety First)

Live vehicle tracking on interactive maps, parent real-time bus monitoring with ETA at every stop, automatic pickup/drop notifications, speed limit violation alerts, route deviation detection, historical journey playback, driver performance analytics, and complete GPS data logging. Ensures complete safety, transparency, and accountability in student transportation.

3. Native Mobile Application (Anytime, Anywhere)

Full-featured native mobile apps for Android and iOS bring the complete ERP experience to every smartphone. AI chatbot, live GPS bus tracking, push notifications, fee payments, assignment submissions, attendance marking, chat, and offline mode ensure every stakeholder stays connected from anywhere.

TRIVARTA TECH PVT LTD

4. Complete Digital Transformation

Eliminates paper-based processes across all departments, creating a fully digital school ecosystem that is efficient, searchable, and environmentally responsible.

5. Centralized Data Management

Provides a single source of truth for all school operations. Student records, financial data, attendance, and communications are all unified in one platform.

6. Multi-Tenant Architecture

Supports multiple schools under one organization with complete data isolation. Ideal for school groups, trusts, and education societies.

7. Role-Based Access Control

Secure, granular permissions ensure each user sees only what they need. Every role has a tailored experience.

8. Real-Time Analytics & Dashboards

Role-specific dashboards with live data provide actionable insights for informed decision-making at every level.

D.R.M. Hospital Building
K.S.R.T.C. Depot Road Chitradurga-577501
9743136128,8660234312
contactus@trivarta.in
trivarta.in

9. Automated Financial Accounting

Double-entry GL posting with automated fee, expense, and payroll tracking eliminates manual accounting errors.

10. Parent & Student Engagement

Dedicated portals, real-time updates, chat, social feed, and multi-channel notifications keep everyone actively engaged.

11. Multi-Channel Communication

SMS, email, WhatsApp, voice announcements, and in-app notifications ensure no message goes undelivered.

12. Comprehensive Reporting

Financial statements, attendance reports, exam analytics, and operational dashboards provide complete visibility.

13. Scalable & Secure

Built on enterprise-grade frameworks with comprehensive activity logging and audit trails.

14. Highly Customizable

Custom fields, custom roles, configurable grading systems, and flexible fee structures adapt to every school.

TRIVARTA
TECH PVT LTD

15. Significant Time & Cost Savings

Reduces administrative overhead and manual data entry by up to 70%.

16. Compliance & Transparency

Complete audit trails and standardized financial accounting ensure regulatory compliance.

D.R.M. Hospital Building
K.S.R.T.C. Depot Road Chitradurga-577501
9743136128,8660234312
contactus@trivarta.in
trivarta.in

9. Implementation Plan

We follow a phased implementation approach to ensure smooth deployment with minimal disruption. AI features, GPS tracking, and mobile app distribution are prioritized throughout the rollout.

Phase	Milestone	Description	Timeline
Phase 1	System Setup	Initial deployment, school profile setup, data migration, and admin training.	0-1 Weeks
Phase 2	Core Go-Live	Launch academics, attendance, fees, AI chatbot, and mobile app distribution.	0-1 Weeks
Phase 3	Extended Modules	Deploy hostel, transport with GPS, front office, health, and parent mobile onboarding.	0-1 Weeks
Phase 4	Full Activation	Activate all communication channels, AI analytics, social feed, and GPS dashboards.	0-1 Weeks

TRIVARTA
TECH PVT LTD

Total estimated implementation timeline: 2 to 5 weeks. This includes web platform deployment, mobile app distribution, AI activation, GPS setup, and comprehensive training for all user roles.

10. Conclusion

Our School ERP system represents a comprehensive, future-ready solution for complete school digital transformation. What makes our platform truly unique is the deep integration of Artificial Intelligence, Real-Time GPS Tracking, and a full-featured Native Mobile Application, which are not add-on features but core pillars of the system architecture.

The AI engine transforms how schools operate by automating administrative tasks, generating intelligent insights, enabling 24/7 chatbot support, and creating personalized student report comments. It shifts school management from reactive to proactive, allowing administrators and teachers to focus on delivering quality education.

The GPS tracking system ensures complete student safety during transportation, provides parents with real-time peace of mind, and gives administrators full visibility into fleet operations. With live tracking, smart alerts, route analytics, and driver monitoring, it sets a new standard for school transport management.

The native mobile application for Android and iOS ensures that every stakeholder has full access to the ERP from anywhere, at any time. From AI chatbot queries to live bus tracking, from fee payments to assignment submissions, the mobile app delivers the complete experience in the palm of your hand.

We are confident that this platform will deliver measurable improvements in operational efficiency, student safety, parent engagement, financial transparency, and academic outcomes for your institution.

TRIVARTA TECH PVT LTD

We Would Love to Demonstrate Our Platform

See our AI Chatbot, Live GPS Tracking, and Mobile App in action with a personalized demo.
