School's 1

School Admin Operating Manual

A Trivartha Tech Pvt Ltd product

Version 1.0 — 2026-04-29

For: School Admin

A practical, module-by-module reference for the school admin who runs School's 1 day-to-day — covering first-time setup, every menu in the sidebar, daily / weekly / monthly / annual operating rhythm, and troubleshooting.

© Trivartha Tech Pvt Ltd

Introduction

Who This Manual Is For

You are the **school admin** — the person who runs School's 1 day-to-day at your school. You hold the `admin`, `school_admin`, `principal`, or `hr` role (any of which gives you unrestricted access). You set up the academic year, admit students, oversee fee collection, schedule exams, run payroll, send announcements, and publish report cards.

You are *not* expected to be an IT person or a developer. This manual contains only what you can do from the screen — every action is described as **Sidebar → Menu → Button → Outcome**.

If something needs server access, code changes, or database surgery, you'll see a note that says *"call IT"* — that's the boundary of this manual.

How to Use This Manual

Three reading paths, depending on why you opened this:

1. **Setting the system up for the first time?** → Read **Part 1: First-Time Setup** in order. Skip nothing — later steps assume earlier ones are done.
2. **Need to do a specific task today?** → Jump to **Part 2: Module-by-Module Operations** via the table of contents.
3. **Want to know what to do this week / month / quarter / year?** → Use **Part 3: Daily / Weekly / Monthly / Annual Rhythm** as a checklist.

If something breaks, **Part 4: Troubleshooting** lists the everyday problems you can fix yourself before calling IT.

Glossary

Term	Meaning
Admission No	Auto-generated unique number assigned to a student when admitted. Format is configured in Settings → Number Formats.
Roll No	Position number within a class/section. Reset when a student is promoted to the next class.
Academic Year	A school year (e.g. 2026-27). All students, fees, exams, and attendance are scoped to one academic year.
Fee Head	A single line item on a fee bill (Tuition, Lab, Library, Dev Fund).

Fee Group	A bundle of fee heads applied to a class or set of students.
GL Posting	The accounting entry that records a transaction in the ledger (e.g. fee payment debits Cash, credits Tuition Income). Done automatically.
Fee Defaulter	A student whose fee has crossed the due date without payment.
Concession	A waiver or discount applied to a student's fee.
Receipt Copy Types	Original, Duplicate, Office Copy, Triplicate — labelled copies of a fee receipt printed together. Configured once in Settings → Receipt Print.
Term	A division of the academic year (Term I / II / III, or Mid / Final).
Grading System	The mapping of marks to grades (A+, A, B, etc.).
Rollover	The end-of-year process that promotes students to the next class and copies forward the fee structure.
Edit Request	A request from a teacher or parent to correct student data. The admin approves or rejects it.
Daily Master Report	An automated daily summary of attendance, fees, and announcements, sent at a configured time to admin contacts.
AI Insights	LLM-generated analytics on attendance, fees, and exam data. Rate-limited.

A fuller glossary is in Appendix F.

Roles You Will Create and Manage

School's 1 ships with **21 pre-configured roles**. As school admin you'll mostly create users and assign one of these roles — you don't normally edit the permission matrix.

The roles are:

Role name (system)	Display label	Plain-language description
`admin`	School Admin	You. Unrestricted school-level access.
`school_admin`	School Admin (Alt)	Backup admin — same access as you.
`principal`	Principal	Full access; usually the academic head.
`hr`	HR Officer	Staff records, leave approval, payroll.
`accountant`	Accountant	All fee collection, expenses, payroll view, financial reports.
`teacher`	Teacher	Marks attendance, enters exam marks, manages diary/ assignments for assigned classes.

`student`	Student	Portal-only: own profile, marks, attendance, fees, timetable.
`parent`	Parent / Guardian	Portal-only: views their child's data; can pay fees online.
`driver`	Driver	Views assigned route/vehicle.
`conductor`	Conductor	Views assigned route/vehicle.
`transport_manager`	Transport Manager	Manages routes, vehicles, allocations, and transport fee collection.
`stationary_manager`	Stationary Manager	Issues stationery, accepts returns, collects stationery fees.
`receptionist`	Receptionist	Front-office operations.
`front_office`	Front Office	Same as Receptionist.
`front_gate_keeper`	Front Gate Keeper	Visitor entry/exit + QR attendance scanner at the gate.
`hostel_warden`	Hostel Warden	Manages hostel rooms, students, and approvals; collects hostel fees.
`mess_manager`	Mess Manager	Manages hostel mess menu and meal records.
`librarian`	Librarian	Library and academic resources access.
`nurse`	Nurse / Medical	Views student health records.
`auditor`	Auditor	Read-only access to everything plus audit log — for compliance.
`it_support`	IT Support	Technical support role for troubleshooting.
`super_admin`	Super Admin	Platform-level — usually held by the vendor (Trivartha Tech). Do not assign.

Rule of thumb when adding a new staff member: pick the *narrowest* role that lets them do their job. Over-permissioning is the most common security mistake.

Part 1 — First-Time Setup

Do these in order. Steps later in the list assume earlier steps are done. Each step says *"You'll know it worked when…"* so you can verify before moving on.

1.1 School Profile

Path: Sidebar → **Settings & Setup** → **General Configuration**

Set the school's identity. This information appears on receipts, report cards, ID cards, and certificates — get it right before printing anything.

Fields to fill:

- School name (full legal name)
- Board (CBSE / ICSE / State / IB / etc.) and affiliation number
- UDISE code (Indian schools — leave blank if not applicable)
- Principal's name (appears on certificates)
- Address — building, street, city, state, PIN
- Phone, email, website
- Logo (upload square PNG or JPG; this prints on every receipt)
- Financial year code (e.g. "FY 2026-27")

You'll know it worked when: the dashboard header shows the school name and logo correctly.

Common mistakes:

- Logo too large → receipts overflow. Use ≤ 200 KB, square aspect ratio.
- Wrong principal name → reprinting all certificates later. Double-check.

1.2 System Configuration

Path: Sidebar → **Settings & Setup** → **System Configuration**

Set timezone, currency, date/time format. These affect every screen.

Then set number formats — *separately* — at **Settings** → **Number Formats**. This controls how Admission No and Roll No are generated (e.g. `SCH-2026-0001` vs `0001`).

Do this once. Changing it after admissions begin creates a mix of old and new format numbers, which is messy.

You'll know it worked when: today's date appears in your chosen format on the dashboard.

1.3 Academic Year

Path: Sidebar → **Settings & Setup** → **Academic Years**

Create the current academic year (e.g. "2026-27") with start and end dates. Mark it as the active year.

If you're setting up mid-year, you may also want to create the next academic year so the Rollover Wizard (Section 1.14, used at year-end) has somewhere to roll students into.

You'll know it worked when: the active year shows in the top bar / dashboard header. Until you do

this, students cannot be admitted, attendance cannot be marked, and exams cannot be created.

1.4 Holiday Calendar

Path: Sidebar → **Holidays & Events**

Add every public holiday for the year. The system uses this list for two things:

1. **Daily 00:30 holiday-fill job** — automatically marks students and staff as `holiday` in the attendance record (so teachers don't see those students on the mark-attendance page on a holiday).
2. **Timetable & exam scheduling** — flagged as conflicts.

Add holidays in bulk; you can mark each as `school holiday`, `optional`, or `exam holiday`.

You'll know it worked when: a known holiday (e.g. Independence Day) appears in the holiday list and shows up shaded on the timetable view.

Common mistake: forgetting state-specific holidays. Re-check at the start of every term.

1.5 Classes, Sections, Subjects

You build the academic structure in this order:

Classes

Path: Sidebar → **Academic Structure** → **Classes**

Create every class your school runs (LKG, UKG, 1, 2, …, 12). Drag and drop to reorder so they display in academic order, not creation order.

Sections

Path: Sidebar → **Academic Structure** → **Sections**

Create sections (A, B, C, …) and assign each to a class.

Subject Types

Path: Sidebar → **Academic Structure** → **Subject Types**

Create the categories: Core, Elective, Co-curricular, Lab, etc.

Subjects

Path: Sidebar → **Academic Structure** → **Subjects**

Create every subject (English, Math, Science, …). Assign a subject type to each.

Assign Subjects

Path: Sidebar → **Academic Structure** → **Assign Subjects**

Map subjects to class-sections. Set the weight (used by weighted grading) if applicable.

You'll know it worked when: picking a class on the timetable page shows the assigned subjects.

1.6 Periods & Timetable Shell

Periods

Path: Sidebar → **Schedule** → **Periods**

Define the period schedule: period 1 starts 08:00 ends 08:45, period 2… include break periods explicitly. Order them.

Timetable

Path: Sidebar → **Schedule** → **Timetable**

Once periods exist, build the per-section timetable: pick a class-section, fill each period × day cell with a teacher + subject. The system warns you if a teacher is double-booked.

You can leave the timetable for later, but **periods must exist before any exam can be scheduled** (exam slots reference periods).

1.7 Grading System & Exam Terms

Grading System

Path: Sidebar → **Examinations** → **Exam Grades**

Define your grade scale (A+, A, B, …) with the mark range for each grade. You can have multiple grading systems (e.g. one for primary, one for secondary).

Exam Terms

Path: Sidebar → **Examinations** → **Exam Terms**

Create the term structure: Term I, Term II, Term III, or Mid-Term, Final. Each term has a date range.

Exam Types

Path: Sidebar → **Examinations** → **Exam Types**

Create exam types: Unit Test, Mid-Term, Final, etc.

Exam Assessments

Path: Sidebar → **Examinations** → **Exam Assessment**

(Optional, for question-wise marking.) Define assessment templates (Q1/20, Q2/30) so teachers can enter sub-marks instead of just totals.

You'll know it worked when: opening **Exam Schedule** lets you pick from your terms and types.

1.8 Fee Structure

Set up fees in this order:

Fee Heads

Path: Sidebar → **Finance & Fees** → (open Fee Structure → Heads section)

Create every line item that appears on a bill: Tuition, Dev Fund, Lab, Computer Fee, Activity Fee, etc.

Fee Groups

Path: Sidebar → **Finance & Fees** → **Groups & Heads**

Group fee heads into bundles. Typical groups: "Class 1–5 Annual", "Class 6–10 Annual", "Hostel — All Classes".

Fee Structure

Path: Sidebar → **Finance & Fees** → **Fee Structure**

Assign a fee group to each class (or section, or specific student set). Set amount, frequency (monthly/quarterly/annual), and due date.

Fee Concessions

Path: Sidebar → **Finance & Fees** → **Concessions**

Define concession types (Sibling, Staff Ward, Merit, Need-based) with percentage or fixed-amount logic.

You'll know it worked when: opening **Collect Fee** for a test student shows the correct amount due and bill breakdown.

1.9 Receipt Print Settings

Path: Sidebar → **Settings & Setup** → **General Config** → click the **Receipt Print** tab in the page's

tab bar.

(Receipt Print is *not* a sidebar item; it lives as a tab on every Settings page. The tab bar appears at the top of General Config, System Config, Daily Report, Admin Numbers, and other settings pages — open any of them and click "Receipt Print".)

This **one setting drives every fee receipt** the system prints — tuition, hostel fee, transport fee, stationary fee. Configure it once and forget it.

Fields:

- **Paper size** — `A4`, `A5`, or `A6`. Pick what your school's printer trays are loaded with. (Default: A4.)
- **Number of copies** — 1 to 4. The system places that many receipts on a single page with a cut-line between them, each labelled:

Copies	Labels printed
1	Original
2	Original, Duplicate
3	Original, Duplicate, Office Copy
4	Original, Duplicate, Office Copy, Triplicate

You'll know it worked when: collecting any test fee → printing → the page shows your chosen number of labelled copies on the chosen paper size.

Important: if you change this setting later, *all subsequent receipts* use the new setting — but already-printed receipts are unchanged.

1.10 Daily Report Settings

Path: Sidebar → **Settings & Setup** → **Daily Report**

Configure the **Daily Master Report** — an automated email/SMS digest sent to school admin contacts.

Fields:

- **Sections enabled** — toggle which sections appear (attendance summary, fee collection, expenses, announcements, etc.).
- **Auto-send time** — time of day in HH:MM (24-hour). The report fires once per day at this time.
- **Auto-send enabled** — master switch. Turn on once you've tested.
- **Weekly digest enabled** — adds a Sunday weekly summary on top.
- **Oversized expense threshold** — currency value; expenses above this are flagged in the report.
- **Low attendance threshold %** — students below this attendance % are flagged.

- **Repeat absent days (2–14)** — students absent this many consecutive school days are flagged.

Pre-requisite: at least one Admin Contact must exist (Settings → General Configuration), or the report has nowhere to go.

You'll know it worked when: at the configured time tomorrow, the admin contacts receive the report.

1.11 Communication Channels

Path: Sidebar → **Communication** → **SMS Config** / **WhatsApp Config** / **Voice Config**

For each channel you intend to use:

1. Enter the API credentials (provided by your channel vendor — Msg91 for SMS by default, Twilio for voice).
2. Click **Send Test** to a known phone number. Verify it lands.
3. Mark the channel as active.

Then create a few starter templates:

- Sidebar → **Communication** → **SMS Templates**
- Sidebar → **Communication** → **WhatsApp Templates**
- Sidebar → **Communication** → **Voice Templates**
- Sidebar → **Communication** → **Push Templates**
- Sidebar → **Communication** → **Email Templates**

Suggested first templates: *Fee Reminder*, *Absence Alert*, *General Announcement*, *Holiday Notice*.

You'll know it worked when: Communication → Communication Logs shows your test sends as `Delivered`.

1.12 Roles & Permissions Review

Path: Sidebar → **Settings & Setup** → **Roles & Permissions**

The 21 default roles described in Roles You Will Create and Manage are pre-configured with sensible permissions. You usually don't need to change them.

Review them once to be sure the permission matrix matches your school's policy (e.g. "should the receptionist see student attendance?"). Make adjustments only if needed.

Do not delete the protected system roles (`super_admin`, `admin`, `teacher`, `student`, `parent`, `accountant`, `driver`) — the system depends on them.

1.13 Staff Onboarding

Create your staff in this order:

Departments

Path: Sidebar → **Staff & HR** → **Departments**

Create departments: Primary, Secondary, Administration, Transport, etc.

Designations

Path: Sidebar → **Staff & HR** → **Designations**

Create designations: PRT, TGT, PGT, Principal, Vice Principal, Accountant, Driver, etc.

Leave Types

Path: Sidebar → **Staff & HR** → **Leave Types**

Define leave categories with annual quotas: Casual (12), Sick (10), Earned (15), etc.

Staff Records

Path: Sidebar → **Staff & HR** → **Staff Directory** → **Add Staff**

For each staff member, fill: name, photo, contact, joining date, qualifications, designation, department, salary structure (basic, HRA, DA, deductions). The salary fields drive payroll later.

User Accounts

Path: Sidebar → **Settings & Setup** → **User Login Management** → **Add User**

For each staff member who needs to log in, create a user with:

- Email (or username, or phone — login accepts any of these)
- Initial password (they'll change it on first login)
- **Role** (one from the list in Roles You Will Create and Manage)
- Link to their Staff record

Tip: for parents/students, IT can run a one-shot bulk-create command (`portal:create-users`) that auto-creates accounts for every parent/student record. Ask them after admissions are loaded.

You'll know it worked when: the staff member logs in with their credentials and sees the dashboard appropriate to their role.

1.14 Optional Modules

If you run hostel, transport, or stationary services, set them up after core setup is done:

Transport

- Sidebar → **Transport** → **Routes** — define each route (start stop, end stop, intermediate pickup points with times).
- Sidebar → **Transport** → **Vehicles** — register each bus (reg no, capacity, driver, conductor).
- Sidebar → **Transport** → **Allocations** — assign students to routes.

Hostel

- Sidebar → **Hostel** → **Hostels** — create the building(s).
- Sidebar → **Hostel** → **Rooms** — create rooms with capacity.
- Sidebar → **Hostel** → **Allocations** — assign students to beds.
- Sidebar → **Hostel** → **Mess** — set up mess menu and meal plans.

Stationary

- (Sidebar entry under Finance in Fee Collect → Stationary; or via a dedicated stationary route.) Set up items, then allocate to students.

Part 2 — Module-by-Module Operations

This part documents every menu item you'll see in the sidebar. Use the table of contents above to jump to a module.

> **Note on labels.** Section headings in this part are descriptive (e.g. "Hostel Dashboard"), but the **Path:** line under each heading always shows the **exact label that appears in the sidebar** (e.g. "Sidebar → Hostel → Dashboard"). When in doubt, follow the **Path:** line — it's the source of truth. The complete sidebar map with every label and route is in Appendix B.

2.1 Dashboard

Three landing pages live under Dashboard:

Dashboard

Path: Sidebar → **Dashboard** → **Dashboard**

Your daily landing. Shows:

- **KPIs** — total students, new admissions today, pending fees, today's fee collection, attendance %, staff present.

- **Charts** — fee trend, admission trend, attendance donut, class-wise attendance, monthly income vs expense.
- **Operational widgets** — pending fee students, low-attendance alerts, absent staff, pending leaves, today's birthdays, today's visitors, upcoming exams, recent announcements.

Use this every morning as your first stop.

Analytics Dashboard

Path: Sidebar → **Dashboard** → **Analytics Dashboard**

Deeper analytical view: trend lines, drill-downs, period comparisons. Click any KPI to drill into the underlying data.

AI Intelligence Hub

Path: Sidebar → **Dashboard** → **AI Intelligence Hub**

LLM-generated insights, saved views, ad-hoc queries about your school's data ("show me classes with declining attendance over the last 30 days", "top 5 fee defaulters with overdue > 60 days"). Rate-limited; if you hit a limit, wait one minute and retry.

2.2 Academics

Thirteen menu items. Most are setup screens you touched in Part 1; here's how to use them day-to-day.

Classes

Path: Sidebar → **Academic Structure** → **Classes**

List of classes. Add / Edit / Reorder via drag-and-drop. Avoid deleting a class once students are enrolled — deactivate instead.

Sections

Path: Sidebar → **Academic Structure** → **Sections**

List of sections. Same edit/reorder pattern.

Subject Types

Path: Sidebar → **Academic Structure** → **Subject Types**

Categories used by Subjects.

Subjects

Path: Sidebar → **Academic Structure** → **Subjects**

Master subject list.

Assign Subjects

Path: Sidebar → **Academic Structure** → **Assign Subjects**

Maps subjects → class-sections. Edit weights for weighted grading.

Student Diary

Path: Sidebar → **Academic Resources** → **Student Diary**

Teacher tool — daily diary entries. As admin you'll mostly view diary completion (which teachers wrote, which didn't).

Assignments

Path: Sidebar → **Academic Resources** → **Assignments**

Teachers create assignments here; students submit via portal. Admin can filter by class/teacher to monitor activity.

Syllabus Tracker

Path: Sidebar → **Academic Resources** → **Syllabus Tracker**

Chapter-level syllabus tracker. Useful at term-end to confirm what was covered.

Digital Resources

Path: Sidebar → **Academic Resources** → **Digital Resources**

Learning materials shared with students (PDFs, links, files).

Book List

Path: Sidebar → **Academic Resources** → **Book List**

Per-class book list — printed and given to parents at year start.

Periods

Path: Sidebar → **Schedule** → **Periods**

Period definitions (start time, end time).

Timetable

Path: Sidebar → **Schedule** → **Timetable**

Section-wise timetable editor.

Incharge Assignment

Path: Sidebar → **Staff & HR** → **Incharge Assignment**

Assign class teachers / section in-charges. Affects who sees what students on attendance / mark entry.

2.3 Attendance

Mark Attendance

Path: Sidebar → **Attendance** → **Mark Attendance**

Class teachers do this every morning. As admin you'll mostly **monitor**: go in, pick any class/section/date to verify attendance was actually marked.

Workflow:

1. Pick **class** → **section** → **date**.
2. Page loads students in roll-no order with photos.
3. For each student, tap **Present**, **Absent**, **Leave**, or **Holiday**. (Holiday rows are pre-filled for declared holidays.)
4. Click **Save**.

If your school uses QR-code attendance at the gate, the `mark_attendance_scanner` permission lets the gate-keeper scan student QR cards instead.

Attendance Report

Path: Sidebar → **Attendance** → **Attendance Report**

Filter by class, section, date range. Export to Excel/CSV/PDF.

Staff Attendance

Path: Sidebar → **Attendance** → **Staff Attendance**

HR or admin marks staff attendance daily. Same Present/Absent/Leave model.

Staff Attendance Report

Path: Sidebar → **Attendance** → **Staff Attendance Report**

Filter and export.

Common issues:

- *Student missing from the roster* → check their class/section assignment for the *current*

academic year (Sidebar → Students → Student Directory).

- *Holiday rows show as Absent* → the daily 00:30 holiday-fill job didn't run. Add the holiday and ask IT to re-run the job manually.

2.4 Students

Registrations

Path: Sidebar → **Student Management** → **Registrations**

Pre-admission applications submitted from the website or by front office. Review → approve (converts to a Student record) or reject.

Student Directory

Path: Sidebar → **Student Management** → **Students Directory**

The master list. Click **Add Student** to admit:

1. Fill: name, DOB, photo, gender, blood group, mother/father name and contacts, address, custom fields.
2. Choose class + section + academic year.
3. Click **Save**.
4. System auto-generates Admission No (per Number Format) and creates Parent / Guardian records.
5. If you provided parent email, a Parent portal user is created (default password — communicate it to them).

For bulk admission, use the **CSV Import** option (admin-only). Download the template, fill it, upload.

Other actions on the directory:

- **View** student profile (academic history, fees, attendance, documents).
- **Edit** student details.
- **Deactivate** instead of delete (preserves history).
- **Generate Documents** — admit card, ID card, bonafide, TC.

Roll Numbers

Path: Sidebar → **Student Management** → **Roll Numbers**

Bulk roll-number assignment per section. Sort by name or admission no, then auto-number.

Student Leaves

Path: Sidebar → **Student Management** → **Student Leaves**

Leave applications submitted by students/parents. Review → approve / reject. Approved leaves are

reflected on attendance.

Student Leave Types

Path: Sidebar → **Student Management** → **Student Leave Types**

Master list (Medical, Family, Religious, etc.).

Transfer Certificates

Path: Sidebar → **Student Management** → **Transfer Certificates**

Issue a TC when a student leaves the school. Fill the form (reason, last attendance date, conduct remark) → generate PDF → print on letterhead.

Edit Requests

Path: Sidebar → **Student Management** → **Edit Requests**

Teachers / parents can request corrections to student data. As admin you review the proposed change → approve (it applies) or reject (with reason).

2.5 Examinations

Exam Terms

Path: Sidebar → **Examinations** → **Exam Terms**

Term I / II / III, etc. (set up in Part 1).

Exam Types

Path: Sidebar → **Examinations** → **Exam Types**

Unit Test, Mid-Term, Final.

Grading Systems

Path: Sidebar → **Examinations** → **Exam Grades**

Mark-to-grade mapping.

Exam Assessments

Path: Sidebar → **Examinations** → **Exam Assessment**

Optional question-wise mark templates.

Exam Schedules

Path: Sidebar → **Examinations** → **Exam Schedule**

For each term/type, schedule each subject's exam: date, time, room.

Workflow:

1. Pick **Term** + **Type** + **Class**.
2. Add a row per subject: date, time, period, room.
3. Save.
4. Schedule appears to teachers and (after publishing) to parents.

Admit Cards

Path: Sidebar → **Examinations** → **Admit Cards**

Generate admit cards in bulk. Pick class + exam → preview → print. Honours the Number Format settings.

Exam Marks (entry)

Path: Sidebar → **Examinations** → **Marks Entry**

Teachers do this; admin can also enter or correct.

1. Pick **Exam** (e.g. "Mid-Term 2026 — Class 5") + **Section** + **Subject**.
2. Page loads students with assessment-item columns (or a single Total column).
3. Enter marks → click **Save**.
4. System auto-calculates grades using the grading system + class weight.

Exam Results

Path: Sidebar → **Examinations** → **Exam Results**

Per-student / per-class result view. Verify before publishing.

Report Cards

Path: Sidebar → **Examinations** → **Report Cards**

1. Pick **Term** + **Class**.
2. Review each report card.
3. Add comments — manually or click **AI Generate Comments** (rate-limited to ~5/minute; use sparingly).
4. Click **Publish** — parents now see the report card on the portal.
5. Print bulk PDFs for paper distribution.

AI Question Papers

Path: Sidebar → **Examinations** → **AI Question Paper**

AI assistant for drafting question papers. Pick subject + class + topics → get a draft paper. Edit before using.

2.6 Finance

The biggest module. Every monetary action in the school flows through here.

Collect Fee

Path: Sidebar → **Finance & Fees** → **Collect Fee**

The most-used screen in this module — used multiple times a day at the front desk.

Workflow:

1. **Search student** by admission no, roll no, or name.
2. The bill loads — pending fee heads with amount due, fine (if any), concession (if any), net amount.
3. Tick the heads being paid (or pay the full amount).
4. Pick **payment method** (Cash / Cheque / Card / UPI / Online).
5. Click **Collect & Print Receipt**.
6. System creates the Fee Payment record + GL posting (debits Cash, credits Tuition Income or the appropriate revenue head).
7. PDF receipt opens with the configured paper size and copies (per Section 1.9). Print and hand the **Original** to the parent; file the other copies.

If a parent pays a partial amount: enter the part-amount; the system records the payment and shows the remainder as still due.

If a parent has a concession: the concession is auto-applied. Override manually if needed (you'll need the `override_fee_discount` permission, which admin and accountant have).

Fee Structure

Path: Sidebar → **Finance & Fees** → **Fee Structure**

Class-wise fee plan. (Set up in Part 1; revisit at year-start to adjust amounts for the new year.)

Fee Groups

Path: Sidebar → **Finance & Fees** → **Groups & Heads**

Fee bundles.

Fee Concessions

Path: Sidebar → **Finance & Fees** → **Concessions**

Define concession types and apply them to specific students.

Fee Due Report

Path: Sidebar → **Finance & Fees** → **Due Report**

Defaulter list — students whose fee is overdue. Filter by class, ageing bucket (0-30, 31-60, 60+ days). Export. Trigger reminder messages straight from this screen via Communication module integration.

Day Book

Path: Sidebar → **Finance & Fees** → **Day Book**

A single day's cash position — opening balance, all receipts, all disbursements, closing balance. Match to your cash drawer at end of day.

Finance Reports

Path: Sidebar → **Finance & Fees** → **Financial Reports**

Pre-built reports: collection by class, collection by head, expense by category, daily/monthly summary.

Expenses

Path: Sidebar → **Finance & Fees** → **Expenses**

Record school expenses (utilities, maintenance, supplies). Fields: category, amount, paid to, payment method, date, attachment (bill scan). Auto-posts to GL.

Ledgers

Path: Sidebar → **Finance & Fees** → **Chart of Accounts**

Master chart of accounts. View any ledger account's running balance.

Finance Transactions

Path: Sidebar → **Finance & Fees** → **Transactions**

Raw transaction list — every GL posting in the system. Use for audit / reconciliation.

Trial Balance

Path: Sidebar → **Finance & Fees** → **Trial Balance**

Standard accounting trial balance — debits should equal credits.

Profit & Loss

Path: Sidebar → **Finance & Fees** → **Profit & Loss**

Income vs Expenses for a period.

Balance Sheet

Path: Sidebar → **Finance & Fees** → **Balance Sheet**

Assets vs Liabilities + Equity at a point in time.

Budgets

Path: Sidebar → **Finance & Fees** → **Budget Management**

Set period budgets per category; report shows variance (budget vs actual).

GL Auto-posting Config

Path: Sidebar → **Finance & Fees** → **GL Auto-Posting**

Maps each fee head and expense category to a ledger account. **Set this up once, with your accountant.** Wrong mapping here means wrong financial reports forever.

2.7 HR

Departments

Path: Sidebar → **Staff & HR** → **Departments**

(Set up in Part 1.)

Designations

Path: Sidebar → **Staff & HR** → **Designations**

(Set up in Part 1.)

Staff Directory

Path: Sidebar → **Staff & HR** → **Staff Directory**

Master staff list. Add / edit / deactivate. Click any staff member for profile (history, leaves, payslips, attendance).

Leaves

Path: Sidebar → **Staff & HR** → **Leave Management**

Pending leave requests. Review → approve / reject with comment.

Leave Types

Path: Sidebar → **Staff & HR** → **Leave Types**

(Set up in Part 1.)

Payroll

Path: Sidebar → **Staff & HR** → **Payroll**

Run payroll once a month, late on the last working day or first of the following month.

Workflow:

1. Click **Generate Payroll**.
2. Pick the **month**.
3. System pulls every active staff member, calculates: basic + HRA + DA – leave deduction – fine – other deductions.
4. Review each row; adjust manually if needed.
5. Click **Mark as Paid** — payroll posts to GL (debits Salary Expense, credits Bank).
6. Click **Download Payslips** for bulk PDF.

Common issues:

- *Staff missing from payroll* → they were marked inactive or have no salary structure. Fix the staff record and regenerate.
- *Leave deductions look wrong* → leave records for that month aren't approved. Approve them first, then regenerate.

2.8 Front Office

Front Office Dashboard

Path: Sidebar → **Front Office** → **Dashboard**

Live counts: visitors today, calls today, gate passes today, pending complaints, recent correspondence.

Visitors

Path: Sidebar → **Front Office** → **Visitor Log**

Log every visitor: name, phone, purpose, person to meet, in-time, out-time. Print a visitor pass.

Gate Passes

Path: Sidebar → **Front Office** → **Gate Passes**

Issue gate passes for students leaving early or staff leaving on duty. Generates a pass with QR

code.

Gate Pass QR Scanner

Path: Sidebar → **Front Office** → **QR Scanner**

The gatekeeper scans the QR on a gate pass to validate it (prevents reuse / forgery).

Complaints

Path: Sidebar → **Front Office** → **Complaints**

Log and track complaints from parents, students, staff, visitors. Assign, update status, close.

Call Logs

Path: Sidebar → **Front Office** → **Call Logs**

Log every important call (incoming and outgoing). Useful for follow-up.

Call Log Follow-ups

Path: Sidebar → **Front Office** → **Follow-Ups**

Tasks created from call logs that need follow-up.

Correspondence

Path: Sidebar → **Front Office** → **Correspondence**

Inward / outward letters. Attach scans, mark as actioned.

Daily Report

Path: Sidebar → **Front Office** → **Daily Report**

The front office's own daily summary — distinct from the school-wide Daily Master Report.

2.9 Hostel

Hostel Dashboard

Path: Sidebar → **Hostel** → **Dashboard**

Bed occupancy, today's roll-call status, pending leave requests, mess attendance.

Hostels

Path: Sidebar → **Hostel** → **Manage Hostels**

Buildings.

Rooms

Path: Sidebar → **Hostel** → **Rooms & Beds**

Rooms per building, with capacity and bed numbers.

Allocations

Path: Sidebar → **Hostel** → **Student Allocations**

Assign students to beds. One bed → one student. The system warns if a bed is double-allocated.

Hostel Gate Passes

Path: Sidebar → **Hostel** → **Gate Passes**

Hostel-specific gate passes for students leaving the hostel for outings, home visits, etc.

Hostel Visitors

Path: Sidebar → **Hostel** → **Visitor Logs**

Visitors to the hostel (often parents).

Mess

Path: Sidebar → **Hostel** → **Mess Menu**

Mess menu by day-of-week and meal (breakfast / lunch / snacks / dinner). Set the menu for the week.

Roll Call

Path: Sidebar → **Hostel** → **Roll Call**

Wardens mark hostel roll call (typically twice daily). Same Present / Absent / On Leave statuses.

Roll Call Report

Path: Sidebar → **Hostel** → **Roll Call Report**

Filter and export.

Hostel Complaints

Path: Sidebar → **Hostel** → **Complaints**

Student complaints (food, water, electricity, room issues).

Meal Report

Path: Sidebar → **Hostel** → **Meal Report**

Per-meal headcount used for catering.

Hostel Fee Collection — done from **Sidebar** → **Finance & Fees** → **Collect Fee** when the student has a hostel fee head, or via the Hostel allocation page. Receipt obeys the same Receipt Print Settings.

2.10 Transport

Transport Dashboard

Path: Sidebar → **Transport** → **Dashboard**

Routes active today, vehicles on road, students allocated, fee defaulters.

Routes

Path: Sidebar → **Transport** → **Routes & Stops**

Define routes with stops (and pickup / drop-off times per stop).

Vehicles

Path: Sidebar → **Transport** → **Vehicles**

Buses with reg no, capacity, driver, conductor, fitness expiry.

Allocations

Path: Sidebar → **Transport** → **Student Allocation**

Assign students to routes (and the stop they board at). Charges transport fee accordingly.

Bus Roll Call

Path: Sidebar → **Transport** → **Bus Roll Call**

Conductor / driver marks attendance at boarding and alighting. Helps with "my child didn't come home" calls.

Route Report

Path: Sidebar → **Transport** → **Route Report**

Per-route summary: total students, fee collected, defaulters.

Transport Fee Defaulters

Path: Sidebar → **Transport** → **Fee Defaulters**

Students with overdue transport fee.

Live Tracking

Path: Sidebar → **Transport** → **Live Tracking**

Map view of buses (requires the GPS device on each bus to be reporting).

Driver Tracking

Path: Sidebar → **Transport** → **Driver Tracking**

Per-driver shift / location history.

Transport Fee Collection — done from **Sidebar** → **Finance & Fees** → **Collect Fee** or from the allocations page. Same receipt format.

2.11 Communication

The most flexible module — also the easiest to misuse. **Test on yourself first.**

Communication Dashboard

Path: Sidebar → **Communication** → **Dashboard**

Sends today, by channel; delivery success rate; pending queue.

Announcements

Path: Sidebar → **Communication** → **Announcements**

Broadcast to selected audiences:

1. Click **New Announcement**.
2. Title + body. Pick channels (SMS, WhatsApp, Email, Push).
3. Pick audience: All, Class(es), Section(s), Roles, or specific users.
4. Schedule (now / future date+time).
5. Click **Send**.

Scheduled announcements are processed by the per-minute background job (`announcements:process`) — they fire automatically at the scheduled time.

Emergency Broadcast

Path: Sidebar → **Communication** → **Emergency Broadcast**

A one-click "send everyone, every channel" path. **Only use for genuine emergencies** — fire, weather closure, security incident.

Communication Logs

Path: Sidebar → **Communication** → **Message Logs**

Every send, every recipient, with delivery status. First place to look when a parent says "I didn't get the message."

Communication Analytics

Path: Sidebar → **Communication** → **Delivery Analytics**

Send volume trends, delivery success by channel, click-through (where trackable).

Email Templates / SMS Templates / WhatsApp Templates / Voice Templates / Push Templates

Paths: Sidebar → **Communication** → (each respective Template item)

Master templates for each channel. Use placeholders like `{student_name}`, `{amount_due}` that get filled in at send time.

Scheduled Messages

Path: Sidebar → **Communication** → **Scheduled Queue**

Future-dated messages. Cancel before send time if needed.

Social Buzz

Path: Sidebar → **Communication** → **Social Buzz**

Captures social media activity (school's posts, mentions). Optional feature; ignore if not configured.

SMS Config / WhatsApp Config / Voice Config

Paths: Sidebar → **Communication** → (each respective Config item)

API credentials and per-channel settings (sender ID, opt-in defaults). Set once.

Internal Chat

Path: Sidebar → **Chat** *(top-level under the Communication group)*

Real-time chat between staff. Useful for "principal's office to all class teachers" announcements.

Holidays & Events

Path: Sidebar → **Holidays & Events** *(top-level under the Communication group)*

(Already covered in Section 1.4.)

2.12 Settings

General Configuration

Path: Sidebar → **Settings & Setup** → **General Configuration**

School profile (name, board, address, contact, logo, financial year code, admin contacts).

Asset Configuration

Path: Sidebar → **Settings & Setup** → **Asset Configuration**

Asset categories, depreciation rules, maintenance defaults — for the school's inventory module.

System Configuration

Path: Sidebar → **Settings & Setup** → **System Configuration**

Timezone, currency, date/time format, system-wide flags.

Mobile QR

Path: Sidebar → **Settings & Setup** → **Mobile QR**

Generate the deep-link QR code that parents scan to install the school's mobile app and auto-link to your school.

Academic Years

Path: Sidebar → **Settings & Setup** → **Academic Years**

List of years; create the next one before each rollover.

Rollover Wizard

Path: Sidebar → **Settings & Setup** → **Setup Wizard**

The end-of-year ritual. Promotes students from the closing year to the new year.

Phases (run in order):

1. **Structure** — copies classes, sections, subjects, fee heads, fee groups to the new year.
2. **Students** — promotes students per the explicit class mapping you provide (e.g. "everyone in 5A goes to 6A unless individually marked otherwise"). Detained students stay back; leavers don't carry over.
3. **Fees** — copies the fee structure forward (you adjust amounts after).
4. **Finalize** — locks the closing year (no more edits).

Permission needed: `manage_rollover` + `execute_rollover` (admin has these by default). **Do not run this until** final exam results are published, all fees are reconciled, and TCs are issued. Practice the mapping in a test environment if possible.

Custom Fields

Path: Sidebar → **Settings & Setup** → **Custom Fields**

Add school-specific fields to the Student / Staff forms (e.g. Aadhaar number, blood group, mother tongue).

Number Formats

Path: Sidebar → **Settings & Setup** → **Number Formats**

Templates for Admission No, Roll No, Receipt No, etc.

Roles & Permissions

Path: Sidebar → **Roles & Permissions** *(top-level under the Settings group)*

The permission matrix.

User Login Management

Path: Sidebar → **User Login Management** *(top-level under the Settings group)*

All user accounts. Add / deactivate / reset password / change role / unlock locked accounts.

Backup Manager

Path: Sidebar → **Backup Manager** *(top-level under the Settings group)*

Schedule and download database backups. Useful for monthly archival.

Activity Log

Path: Sidebar → **Utility** → **Activity Log**

Audit trail — every meaningful action with user, time, IP, before/after values. Use for "who deleted that?" questions.

Error Log

Path: Sidebar → **Utility** → **Error Log**

System errors. Mostly for IT; occasionally useful when a screen behaves oddly — share the error ID with IT.

ID Cards & Certificates

Path: Sidebar → **Utility** → **ID Cards** / **Certificates**

Bulk generation of student ID cards and certificates (bonafide, character, pass, custom). Pick the template, filter the students, generate, print.

2.13 Parent / Student Portal

This isn't a sidebar item *for you* — it's what parents and students see when they log in. Knowing what they see helps when they call you.

What a parent sees:

- **Dashboard** — each child's name, class, photo, fee balance, attendance %.
- **Fees** — pending and paid history. **Pay Online** button → Razorpay checkout. After payment, receipt is auto-generated.
- **Attendance** — calendar view of present/absent days.
- **Marks** / **Report Cards** — published exam results.
- **Assignments** — their child's assignments and submission status.
- **Diary** — daily diary entries from the class teacher.
- **Announcements** — messages from the school.
- **Apply for Leave** — submit a student leave request (you approve it via Sidebar → **Student Management** → **Student Leaves**).

What a student sees:

A subset of the above — own profile, own attendance, own marks, own assignments, own timetable, own fee summary.

If a parent calls you about something on their portal, log into the admin portal, search for the student, and you'll see the same data they see — usually the issue is published-but-not-seen or a permission glitch.

2.14 Stationary

A full module for schools that supply stationery items (notebooks, textbooks, lab kits) to students with separate billing.

Stationary Dashboard

Path: Sidebar → **Stationary** → **Dashboard**

Items issued today, fees collected, defaulters, return queue.

Items

Path: Sidebar → **Stationary** → **Items**

Master stationery catalogue: name, SKU, unit price, current stock.

Allocations

Path: Sidebar → **Stationary** → **Allocations**

Allocate items to a student or class. Triggers a stationary fee bill.

Fee Collection

Path: Sidebar → **Stationary** → **Fee Collection**

Collect stationary fees. Receipt prints with the same Receipt Print Settings as tuition fees.

Fee Defaulters / Collection Pending / Returns

Paths: Sidebar → **Stationary** → **Fee Defaulters** / **Collection Pending** / **Returns**

Operational reports — chase unpaid stationary fees, track items not yet issued, and process returned items (with refund GL postings).

2.15 Inventory & Assets

Path: Sidebar → **Inventory & Assets**

The school's asset register — purchased items, depreciation, maintenance logs, disposal. Use for furniture, lab equipment, IT hardware, vehicles (non-bus), facility assets.

Workflow:

1. Add an asset with purchase price, date, vendor, expected lifespan.
2. Record maintenance events (cost, vendor, downtime).
3. At year-end, run depreciation (configured under Settings → Asset Config).
4. When disposed, mark the asset and record sale value (if any).

2.16 Daily Master Report

Path: Sidebar → **Daily Master Report**

The on-demand version of the auto-emailed daily report (covered in Section 1.10). Use this when:

- Yesterday's report didn't arrive and you need a quick view.
- You want to verify what was sent.
- You need an ad-hoc report for a date earlier in the week.

The report shows: attendance summary, today's fee collection, expense flags (above threshold), pending leaves, low-attendance students, repeat absentees, recent announcements. The sections

shown match what's enabled in Settings → Daily Report.

2.17 AI Intelligence

Path: Sidebar → **AI Intelligence**

LLM-powered analytics for ad-hoc questions and saved insights. Use cases:

- **Trend analysis:** "Show me classes with declining attendance over the last 30 days." → System runs the underlying query, generates a chart and a narrative summary.
- **Drill-down comparisons:** "Compare fee collection in April vs March by class."
- **Saved views:** Save useful queries; re-run any time. Appears on the AI Intelligence Hub on the Dashboard.
- **Chart explanation:** On any dashboard chart, click "Explain this" for an AI-generated narrative summary.
- **Export:** Any insight can be exported to PDF or Excel.

Rate-limited to prevent abuse. If you hit a limit, wait one minute and retry.

2.18 Other Modules

Brief notes on smaller modules surfaced in the sidebar:

- **Alumni** *(Sidebar → Alumni)* — basic alumni directory: name, batch, current contact, optional notes. Useful for newsletters and reunions.
- **Student Houses** → **Manage Houses** / **Leaderboard** — competitive house system. Create houses, assign students, award/deduct points; the leaderboard ranks them.
- **Disciplinary Records** *(Sidebar → Student Management → Disciplinary Records)* — log incidents per student with category, severity, action taken, follow-up date.
- **PTM Sessions** *(Sidebar → Schedule → PTM Sessions)* — schedule parent-teacher meeting slots; parents book a slot via the portal.
- **Staff History Log** *(Sidebar → Staff & HR → Staff History Log)* — audit trail of staff record changes (promotions, transfers, salary revisions).
- **Date-wise Report, Attendance Forecast** *(Sidebar → Attendance → ...)* — alternative attendance views: a single date across all classes, and a forecast model based on trends.
- **Mark Summary** *(Sidebar → Examinations → Mark Summary)* — class / subject-wise summary of marks entered, useful before publishing results.
- **Notification Config** *(Sidebar → Communication → Notification Config)* — turns specific system notifications on / off (e.g. "send SMS on absence", "send WhatsApp on fee due").
- **Admin Numbers** *(Sidebar → Settings & Setup → Admin Numbers)* — list of phone numbers / emails who receive admin-level notifications, including the Daily Master Report.

Part 3 — Operating Rhythm

If you do nothing else from this manual, do **the daily checklist** every day.

Daily Checklist

Each morning (≈ 15 minutes):

1. **Confirm yesterday's Daily Master Report arrived** in your inbox at the configured time.
2. **Review the Dashboard** — KPIs at the top. Note anything red.
3. **Review attendance** — Sidebar → Attendance → Mark Attendance, scan a sample of class-sections to confirm teachers are marking on time.
4. **Review today's fee collection** — Dashboard widget; or Sidebar → Finance → Day Book.
5. **Review pending fees** — Dashboard widget "Pending Fee Students."
6. **Approve / reject pending requests:**
   - Leave requests (Sidebar → HR → Leaves; Sidebar → Students → Student Leaves).
   - Edit requests (Sidebar → Students → Edit Requests).
   - New admission applications (Sidebar → Students → Registrations).
7. **Scan announcements queue** — anything pending or scheduled?
8. **Clear front-office complaints** — Sidebar → Front Office → Complaints, any new entries since yesterday.

Weekly Checklist

Once a week (Friday afternoon works well):

1. **Defaulter report** — Sidebar → **Finance & Fees** → **Due Report**. Sort by ageing. From the page, trigger reminder SMS / WhatsApp via Communication.
2. **Staff attendance & pending leaves** — Sidebar → HR → Leaves.
3. **House points** (if you run the house system) — Sidebar (Houses page, if enabled).
4. **Disciplinary log** — review new incidents.
5. **Backups** — run the exports you care about (students, fee payments, attendance for the week) via the per-page Excel/CSV/PDF download.

Monthly Checklist

End-of-month / first of next month (≈ 60-90 minutes):

1. **Run payroll** — Sidebar → HR → Payroll → Generate → Review → Mark as Paid.
2. **Finance reports** — Sidebar → **Finance & Fees** → **Financial Statements** (Profit & Loss tab) for the month; Trial Balance to verify books are balanced.

3. **Budget variance** — Sidebar → **Finance & Fees** → **Budget Management**.
4. **Transport fee defaulters** — Sidebar → Transport → Transport Fee Defaulters.
5. **Inventory stock check** — Settings → Asset Configuration if managing assets; physical stock count of stationery.
6. **AI Insights review** — Sidebar → Dashboard → AI Intelligence Hub. Save any useful views.
7. **Communication analytics** — Sidebar → Communication → Communication Analytics. Channels with low delivery rates → escalate to channel vendor.

Term / Quarterly

At the start of each term:

1. **Schedule exams** — Sidebar → Examinations → Exam Schedules.
2. **Generate admit cards** — Sidebar → Examinations → Admit Cards.
3. **Update syllabus progress** — Sidebar → **Academic Resources** → **Syllabus Tracker**.

At the end of each term:

1. **Collect marks** — confirm all teachers have entered marks (Sidebar → Examinations → Exam Marks).
2. **Verify results** — Sidebar → Examinations → Exam Results.
3. **Generate report cards** with comments — Sidebar → Examinations → Report Cards. Use AI Generate Comments sparingly.
4. **Publish report cards** — parents now see them on the portal.
5. **Print bulk** — for paper distribution at PTM.

Annual Cycle

The yearly journey, March to March (or whatever your school's calendar):

Year-end (last 4-6 weeks)

1. **Conduct final exams** + enter marks.
2. **Generate and publish final report cards.**
3. **Reconcile fees** — every student's fee account should be settled or formally written off. Check Fee Due Report = clean.
4. **Issue TCs** for leaving students (Sidebar → Students → Transfer Certificates).
5. **Close month-end** finance books for the closing year.
6. **Run final payroll** for the closing year.

Year-start (just before the new year begins)

1. **Create the new academic year** (Sidebar → Settings → Academic Years) if not done already.
2. **Run the Rollover Wizard** (Sidebar → Settings → Rollover Wizard) — structure → students →

fees → finalize. **Practice on test data first if you can.**

3. **Adjust the new year's fee structure** — typical inflation increases.
4. **Re-assign roll numbers** (Sidebar → Students → Roll Numbers).
5. **Update the holiday calendar** for the new year (Sidebar → **Holidays & Events**).
6. **Review staff salary structures** for any increments.
7. **Print and distribute new ID cards** (Sidebar → Examinations / Students sub-features) for re-photo or class-change updates.
8. **Onboard new admissions** as they come in.
9. **Print book lists** (Sidebar → **Academic Resources** → **Book List**) and circulate to parents.

Anytime in the year

- **Backup exports** — at minimum, monthly: Students, Staff, Fee Payments, Attendance, Ledger transactions. Use the per-page Excel export.

Background Jobs (Informational)

These run automatically. You don't trigger them — they're listed so you aren't surprised:

When	What runs	What it does
Every minute	`announcements:process`	Sends queued / scheduled announcements.
Every minute	`report:daily-master`	Checks if the configured send time matches; if so, sends Daily Master Report.
Every 15 min	`auth:clear-resets`	Removes expired password-reset tokens.
Hourly	`app:cleanup-voice-cache`	Cleans stale voice-call cache files.
Daily 00:30	`attendance:fill-holidays`	Auto-fills `holiday` attendance for declared holidays.
Daily 03:00	`model:prune`	Permanently deletes records soft-deleted > 90 days.
Daily	`sanctum:prune-expired`	Removes API tokens older than 30 days.
Weekly Sun 02:00	`activitylog:clean`	Removes activity-log entries older than 1 year.

If any of these stops running, you'll notice symptoms (Daily Master Report doesn't arrive; password resets stay valid forever; etc.). **Call IT** — they need to verify the cron job on the server.

Part 4 — Troubleshooting

The everyday problems you can fix yourself, without calling IT.

A user can't log in

1. Sidebar → **User Login Management**.
2. Find the user. Confirm **Active** is on.
3. If active and they say "wrong password," click **Reset Password** and give them the new one.
4. The system accepts login by **email**, **username**, or **phone** — make sure the user is entering the same one that's on file.
5. If still failing → **Activity Log** for their email; if many recent failed attempts, account may be lock-protected → ask IT to unlock.

Fee receipt prints wrong size or wrong number of copies

1. Sidebar → **Settings & Setup** → **Receipt Print**.
2. Verify Paper Size and Copies are what you expect.
3. Save → next receipt uses the new setting.

Fee receipt is missing details (class, parent name, address)

The receipt pulls fields from the Student record. Open the student (Sidebar → Students → Student Directory → student) and confirm the missing fields are filled. Save the student record, retry.

Parent says "I didn't get the SMS / WhatsApp / email"

1. Sidebar → **Communication** → **Communication Logs**.
2. Filter by recipient phone or email.
3. Look at delivery status:
   - `Delivered` → it was delivered; problem is the parent's phone / spam folder.
   - `Failed` → click for reason. Common: invalid number, opted out, channel down.
   - `Queued` → may be backlogged. Wait 5 min; if still queued, call IT.
4. To re-send, open the original message and click **Resend**.

Marks won't save

- Confirm the exam isn't published (published exams lock marks).
- Confirm the teacher is assigned to that section + subject (Sidebar → Academics → Class Subjects).

Report card not visible to parent

The most common cause: it isn't published yet.

1. Sidebar → **Examinations** → **Report Cards**.
2. Find the term + class.

3. Click **Publish**.

Online payment received but receipt not generated

1. Sidebar → **Communication** → **Communication Logs** — confirm payment notification was received.
2. Sidebar → **Finance & Fees** → **Transactions** — search by amount or parent phone, see if a Fee Payment was created.
3. If yes → go to Sidebar → **Finance & Fees** → **Collect Fee** → student → it should show as paid; print receipt.
4. If no → call IT (Razorpay webhook may have failed); meanwhile, manually record the payment in **Collect Fee** with **Online** as the method.

Daily Master Report didn't arrive

1. Sidebar → **Settings & Setup** → **Daily Report**. Confirm:
   - **Auto-send enabled** is on.
   - **Auto-send time** is what you expect (24-hour, HH:MM).
   - At least one Admin Contact exists (Sidebar → Settings → General Configuration).
2. If all looks right → call IT to verify the per-minute scheduler is running.

Student doesn't appear in the attendance roster

1. Sidebar → **Student Management** → **Students Directory** → search the student.
2. Open profile, check **Class**, **Section**, and **Academic Year**.
3. They must be in the *current* academic year and assigned to the class you're trying to mark.

AI chat / insights say "rate limit"

You hit the throttle. Wait one minute and retry. (5/min for report-card comments; 30/min for chat.)

Receipt or PDF prints with garbled font

The browser's PDF renderer may be missing fonts. Use Chrome / Edge — they ship with the fonts the system uses. If still broken, call IT.

Appendix A — Roles Cheat-Sheet

Full list of pre-configured roles and their default permission scope. Source: the system seeder — do not edit role definitions in the database directly.

Role	Default scope

super_admin	Everything. Reserved for vendor (Trivartha Tech).
admin	Everything within the school.
school_admin	Everything within the school (alternate admin).
principal	Everything within the school (academic head).
hr	Staff CRUD, Payroll CRUD, payslip download, leave approval, attendance view, audit log view.
teacher	Student view, attendance CRUD + scanner + export, academic CRUD (diary, assignments, syllabus), exam view + create + edit + mark entry + schedule/ term/type/grade/assessment management, schedule view, chat, reports view, payslip download (own), transport view, student leaves view + approve + download.
accountant	Student view; fee CRUD + waive + receipt + structure + override discount; transport / hostel / stationary fee collection; expense CRUD; payroll view + payslip; reports view + financial reports + export; chat.
student	Own portal: own student / attendance / fee / exam view, academic view, exam view, schedule view, own documents, own fee receipt generation, chat, transport view (own bus), student leaves apply + view + download (own).
parent	Own children's portal: same as student plus view + apply leave for child; chat; view child's transport / hostel / stationary.
driver	Transport vehicle / route / tracking view; chat.
conductor	Transport vehicle / route / tracking view.
transport_manager	Transport vehicles / routes / allocations CRUD; collect transport fee; generate fee receipt; student view; tracking view.
stationary_manager	Stationary items / allocations CRUD; issue items; accept returns; collect stationary fee; receipt generation; student view.
receptionist / **front_office**	Front-office CRUD; student view; attendance view.
front_gate_keeper	Front-office view + create + edit; student view; attendance view + QR scanner; chat.
hostel_warden	Hostel CRUD; collect hostel fee; student view.
mess_manager	Hostel view + create.
librarian	Academic view; student view.
nurse	Student view (for health records).
auditor	Read-only across everything; export data; audit log + financial reports view.

it_support	(Custom — set by your IT team.)

Appendix B — Sidebar Map

Every group, item, and route exactly as it appears in the live UI sidebar. Source of truth: `resources/js/config/sidebar.js`. Items in **bold** are collapsible parent menus.

Always visible

- Dashboard → `/dashboard`

Administration

- Analytics Dashboard → `/school/analytics`
- Alumni → `/school/alumni`
- **Academic Structure**
  - Classes → `/school/classes`
  - Sections → `/school/sections`
  - Subject Types → `/school/subject-types`
  - Subjects → `/school/subjects`
  - Assign Subjects → `/school/class-subjects`
- **Academic Resources**
  - Student Diary → `/school/academic/diary`
  - Assignments → `/school/academic/assignments`
  - Syllabus Tracker → `/school/academic/syllabus`
  - Digital Resources → `/school/academic/resources`
  - Book List → `/school/academic/book-list`
- **Student Houses**
  - Manage Houses → `/school/houses`
  - Leaderboard → `/school/houses/leaderboard`
- **Student Management**
  - Registrations → `/school/registrations`
  - Students Directory → `/school/students`
  - Student Leaves → `/school/student-leaves`
  - Student Leave Types → `/school/student-leave-types`
  - Roll Numbers → `/school/roll-numbers`
  - Transfer Certificates → `/school/transfer-certificates`
  - Disciplinary Records → `/school/disciplinary`

- **Attendance**
  - Mark Attendance → `/school/attendance`
  - Attendance Report → `/school/attendance/report`
  - Date-wise Report → `/school/attendance/date-wise`
  - Attendance Forecast → `/school/attendance/forecast`
- **Examinations**
  - Exam Terms → `/school/exam-terms`
  - Exam Types → `/school/exam-types`
  - Exam Grades → `/school/grading-systems`
  - Exam Assessment → `/school/exam-assessments`
  - Exam Schedule → `/school/exam-schedules`
  - Admit Cards → `/school/admit-cards`
  - Marks Entry → `/school/exam-marks`
  - Results → `/school/exam-results`
  - Mark Summary → `/school/exam-mark-summary`

Utilities

- **Utility**
  - ID Cards → `/school/utility/id-cards`
  - Certificates → `/school/utility/certificates`
  - Activity Log → `/school/utility/activity-log`
  - Error Log → `/school/utility/error-log`

Portal *(visible only to Parent / Student users)*

- **Fee Payment**
  - Pay Fees → `/portal/fees`
  - Payment History → `/portal/fees/history`
- PTM Booking → `/school/ptm/parent/view`
- My Gate Passes → `/school/hostel/my-gate-passes`

> **Settings sub-tabs (not in the sidebar but reachable from any Settings page):** every page under **Settings & Setup** displays a tab bar that includes **General Config, Asset Config, System Config, Admin Numbers, Daily Report, Receipt Print, Mobile App QR, GeoFence Config, Activity Log, Receipt Print Settings**. **Receipt Print is reached only**

> **via this tab bar** — it is not a sidebar item. Open any Settings page from the sidebar, then click the **Receipt Print** tab.

Appendix C — Reports Index

Report	Where to find it	What it answers
Daily Master Report	Auto-emailed daily; configure at Settings → Daily Report	One-glance summary of yesterday's school operations.
Attendance Report	Attendance → Attendance Report	Class / date-range attendance with %.
Staff Attendance Report	Attendance → Staff Attendance Report	Staff present / absent / leave by date.
Fee Due Report	Finance → Fee Due Report	Who owes what. Ageing buckets.
Day Book	Finance → Day Book	Today's cash position.
Finance Reports	Finance → Finance Reports	Pre-built collection / expense / period reports.
Trial Balance	Finance → Trial Balance	Accounting trial balance.
Profit & Loss	Finance → Profit & Loss	Income vs expenses for a period.
Balance Sheet	Finance → Balance Sheet	Assets vs liabilities at a point in time.
Route Report	Transport → Route Report	Per-route headcount and fee.
Transport Fee Defaulters	Transport → Transport Fee Defaulters	Overdue transport fee list.
Roll Call Report	Hostel → Roll Call Report	Hostel roll call summary.
Meal Report	Hostel → Meal Report	Hostel meal headcount.
Communication Analytics	Communication → Communication Analytics	Send / delivery / engagement by channel.
Front Office Daily Report	Front Office → Daily Report	Visitors, calls, gate passes, complaints today.
Activity Log	Settings → Activity Log	Audit trail.
Error Log	Settings → Error Log	System errors (mostly for IT).
AI Insights	Dashboard → AI Intelligence Hub	LLM-generated narrative analytics.

Appendix D — Exports Index

Almost every list page in the system has an export button. The system supports four output formats, selected by the URL query parameter `?output=…`:

Format	Query value	Output
Excel (default)	`?output=excel`	`.xlsx` download
CSV	`?output=csv`	`.csv` download
PDF	`?output=pdf`	`.pdf` download (A4)
HTML print view	`?output=html`	inline printable view

You don't usually need to type the URL — every list page has dropdown buttons for **Export** → **Excel** / **CSV** / **PDF** / **Print**.

Common exports:

- **Students** — full directory or filtered subset.
- **Staff** — directory with salary breakdown.
- **Attendance** — filtered student or staff attendance.
- **Fee Payments** — receipt history.
- **Due Report** — defaulter list.
- **Transactions** — GL transactions.
- **Expenses** — expense register.
- **Budget Management** — budget vs actual.
- **Diary entries**.
- **Book List**.
- **Chart of Accounts**.
- **Assignments**.

For backups, the recommended monthly cadence: export Students, Staff, Fee Payments, Attendance, and the Finance Transactions register at month-end — keep the Excel files in your school's cloud drive.

Appendix E — Communication Templates

The system comes with starter templates per channel. You can edit them at:

- Sidebar → Communication → **SMS Templates**

- Sidebar → Communication → **WhatsApp Templates**
- Sidebar → Communication → **Voice Templates**
- Sidebar → Communication → **Push Templates**
- Sidebar → Communication → **Email Templates**

Templates support **placeholders** that get filled in at send time:

Placeholder	Filled with
`{student_name}`	The student's full name.
`{class_section}`	e.g. "5-A".
`{parent_name}`	Mother / Father name from the student record.
`{amount_due}`	Pending fee amount.
`{due_date}`	Fee due date in school date format.
`{school_name}`	From General Configuration.
`{date}`	Today's date.
`{message}`	Your custom body.

(Available placeholders depend on the template's context; the editor shows which ones work where.)

Recommended starter templates:

- **Fee Reminder** — *"Dear {parent_name}, fee of {amount_due} for {student_name} (class {class_section}) is due on {due_date}. Please pay via the parent portal. — {school_name}"*
- **Absence Alert** — *"Dear {parent_name}, {student_name} is absent today. Please confirm. — {school_name}"*
- **General Announcement** — *"{school_name}: {message}"*
- **Holiday Notice** — *"{school_name}: school will be closed on {date}. Classes resume the next working day."*

Test every template on yourself before broadcasting.

Appendix F — Glossary (Expanded)

Term	Definition
Academic Year	A school year, used to scope every record (students, fees, exams, attendance). Switch the active year via Settings → Academic Years.

Admission No	Auto-generated unique identifier for every student. Format set in Settings → Number Formats. Doesn't change after admission.
Roll No	Position within a class-section. Reset every academic year via Sidebar → Students → Roll Numbers.
Active / Inactive	A staff member or user who can no longer log in / be selected in workflows but is preserved for historical records. Always **deactivate**, don't delete.
Allocation	A student's assignment to a transport route, hostel bed, or stationary item set.
Audit Log	Settings → Activity Log. Every meaningful change with user, time, IP, before/after. Available to admin and auditor roles.
Concession	A discount or waiver applied to a student's fee. Defined as a type in Sidebar → Finance & Fees → Concessions, then assigned per student.
Custom Field	A school-specific field added to Student / Staff forms via Settings → Custom Fields.
Day Book	A single day's complete cash movement summary.
Defaulter	A student with overdue fee.
Edit Request	A teacher's or parent's proposal to change a student's data, awaiting admin approval.
Emergency Broadcast	A one-click send-to-all-channels-and-everyone path. Use only for genuine emergencies.
Fee Group	A bundle of fee heads applied together (e.g. "Class 1–5 Annual").
Fee Head	A single line item on a fee bill (Tuition, Lab, Library, Dev Fund).
Fee Structure	The mapping of fee groups to classes (or sections, or specific students).
Fine	Late-payment penalty added automatically when a fee head crosses its due date.
GL Auto-posting	The mapping of each fee head and expense category to a chart-of-accounts ledger. Configured in Sidebar → Finance & Fees → GL Auto-Posting.
Grading System	The mapping of marks to grades, used by exam results.
Holiday	A non-working day declared in Sidebar → Holidays & Events. The 00:30 holiday-fill job auto-marks attendance for these.
Incharge	The class teacher / section in-charge assigned in Sidebar → Staff & HR → Incharge Assignment.
Ledger	An accounting account (Cash, Bank, Tuition Income, Salary Expense, etc.).
Permission	A specific action a role can perform (e.g. `view_fee`, `generate_fee_receipt`).
Promote	Move a student to the next class at year-end via the Rollover Wizard.

Receipt Copy Types	Original, Duplicate, Office Copy, Triplicate — labelled receipt copies set in Receipt Print Settings.
Role	A named bundle of permissions (e.g. `accountant`, `teacher`). Assigned per user.
Rollover	The end-of-year migration from the closing year to the new year.
Section	A subdivision of a class (A, B, C, etc.).
Term	A division of the academic year (Term I / II / III, or Mid / Final).
Timetable	The per-section weekly schedule of period × day → teacher + subject.
User	A login account. Linked to a Staff record (for teachers, accountant, principal, etc.) or a Student / Parent record (for portal users).

Appendix G — Change Log

Version	Date	Notes
1.0	2026-04-29	Initial release. Module-by-module coverage of all 25 functional areas, sidebar map sourced from `resources/js/config/sidebar.js`, role definitions sourced from `RolePermissionSeeder`.

End of School Admin Operating Manual. For technical queries, contact your IT support contact at Trivartha Tech Pvt Ltd.
